General Information

The narrow fence picket from Gard has three longitudinal grooves that optimally stiffen the product.

Type of material

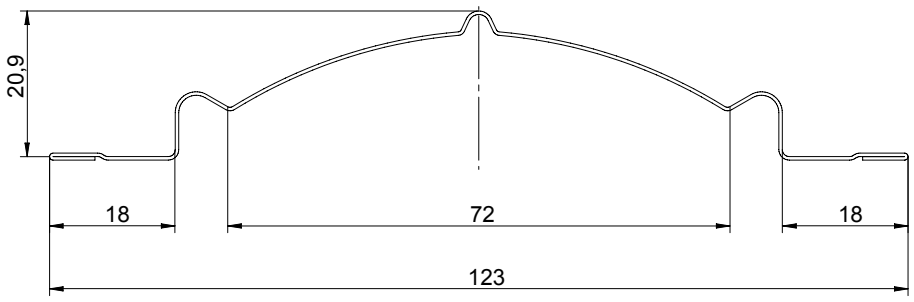
Narrow fence pickets are available in double-sided painted versions, both matte and glossy, as well as single-sided painted versions.

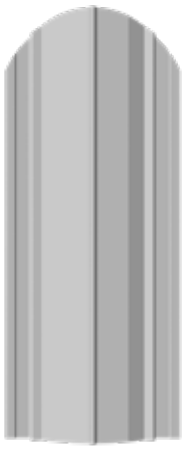
Technical details

Profile height:	**20,9 mm**	Element length:	**to the desired size**
Width of load	**156 mm**	Maximum recommended element length:	**2400 mm**
Usable width:	**123 mm**	Minimum element length:	**150 mm**
Overall width:	**123 mm**		

Dimensions and cross section

Narrow fence pickets are available with the option of straight or curved cutting.





Application

Narrow fence pickets are used to build fences. They allow you to freely shape the fence line and choose the optimal height according to individual needs as well as freely adjust the fence clearance. The unquestionable advantage of the system is the extremely simple and quick installation, which can be carried out by yourself. It is recommended to install narrow fence pickets vertically. Another advantage is that narrow fence pickets are easy to keep clean – they do not require any special maintenance.

Cleaning

If necessary, narrow fence pickets should be cleaned carefully using cold or lukewarm water. You can use a slightly alkaline washing liquid without oxidants (e.g., chlorine). After using the detergent, the surface of the narrow fence picket should be rinsed with cold water. To avoid scratching the coating, do not use scouring brushes or scrapers.

Fixes and varnishing

Local, small losses of varnish on the varnish layer, resulting from, e.g., mechanical damage during transport, assembly and operation, can easily be touched-up with a small amount of self-drying varnish in the open air. Depending on the size of the damaged area, it is best to use a marker pen, spray paint, brush or spray gun. It is recommended to use specially designed manufacturer's varnishes, available at our points of sale.

Packing

Fence pickets are packed using stretch foil and adhesive tape. Packaging elements protect goods during transport. Packaging methods may vary depending on the size of the order and the country of distribution due to the specifics of the local market.

Additional information

Properly prepared instructions for transport, storage, cutting and maintenance of sheet metal are issued for our products. In order to familiarise yourself with their content, please visit our website www.blachotrapez.eu, or contact one our company branches and talk to our Sales Representatives, whose addresses and phone numbers can be found on our website. We also have numerous awards and certificates, which can be viewed on our website www.blachotrapez.eu
