## Aluminium

---

### Advantages and properties

---

Material	
Organic coating	Poliester Standard
Coating system	2-layer
Organic coat thickness side A	25 [µm]
Environment classification according to EN 1396	index 3 category 4a
Reaction to fire	A1
Resistance to external fire	F roof (t1), F roof (t2), F roof (t3)

### Warranty:

---

Aluminium	60 years
-----------	----------

### Test results / Documentation

---

In accordance with EN 508-2

Aluminium is non-combustible. It will not burn and will not support combustion. Its melting point is approximately 630°C. As a result it will melt in an intense fire. It is essential that the effect of a fire is evaluated after studying the whole structure.
